GRE TIPS
AND TRICKS

- Keep doing the practice tests. Practice makes perfect.
- Keep reading for fun during your free time. This will help you to speed read on the general test's verbal reasoning section.
- Boost your vocabulary. Read challenging books that force you to discern the meaning of words you don't know.
- Don't ignore the essay section. Look up some sample essays online and brush up on your writing skills. You will be surprised at your productive results.
- Write at least three full-length [GRE mock tests](#) before the main one. This is very helpful in building your pacing and time management skills. Your training becomes far more efficient when you put yourself under the rigorous time pressure of the actual exam.
- Focus on your weak areas. This will help in raising your score, as you will devise strategies to prevent making mistakes that you made earlier.
- Keep an up-to-date list of mathematical equations that you forgot. This facilitates fast and accurate recall of those equations in the future.
- Know exactly what to expect and memorize the structure of the exam. Read each question very carefully to avoid silly mistakes.
- GRE quant focuses on testing the reasoning ability of the student. Many of the questions are based on simple logic with a twist to it, making them brain teasers. In understanding these subtle nuances, lies their solution.
- Do the easy questions first and answer all the questions. There is no penalty for guessing. Use the process of elimination to increase the chances of guessing correctly.
- Most importantly, stay calm. Anxiety will not yield good results and will lead to valuable time being wasted. If your results don't look good, you can always take the GRE again.
